ENVIRONMENTAL SCIENCE TEST 1 REVISION GUIDE

The test will cover Environmental Science Book pages 2-6.

1 List the seven characteristics of living things: MRS GREN

Movement, Reproduction, Stimuli/Sensitivity, Growth, Respiration, Excretion, Nutrition

2 Circle the non-living organisms in the picture below:

3 Match the definition to the word by writing the correct letter on the line.

C Ecosystem

B Population

A Community

D Biotic

E Abiotic

~~A) All the different species that live together in an area.~~

~~B) One type of living thing living in an area.~~

~~C) Living things interacting with each other and their environment.~~

~~D) Living things.~~

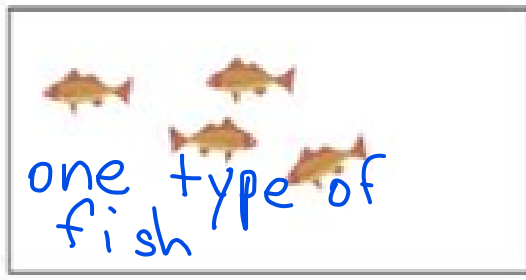

~~E) Non-living things.~~

4 Label the pictures below with one of the words below.

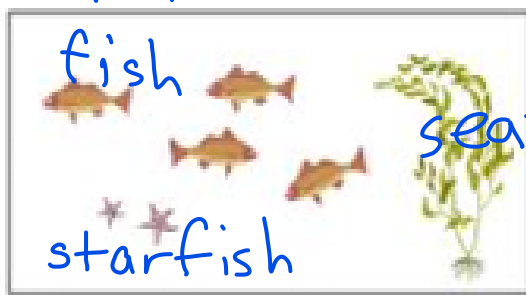

Ecosystem

Population

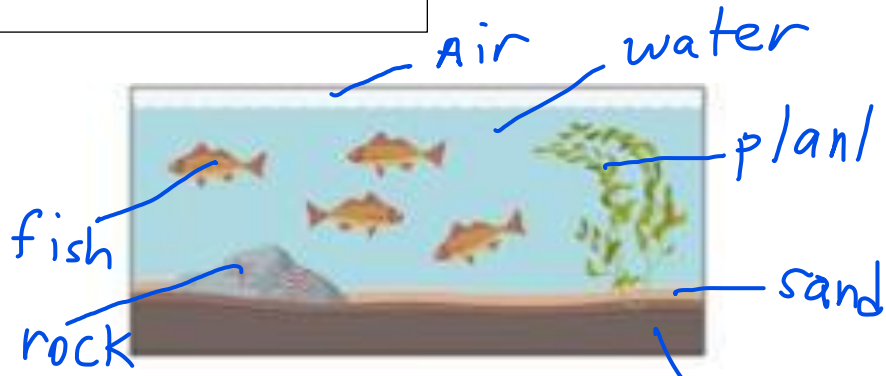

Community

a) population

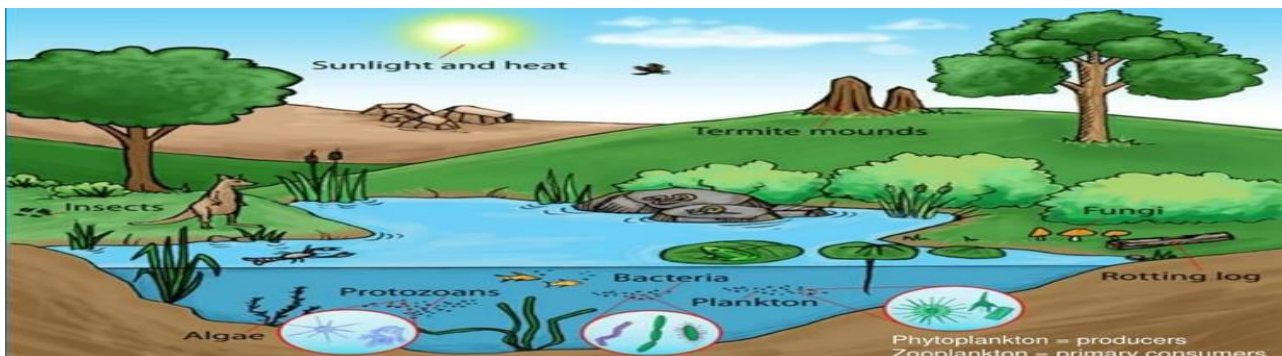

b) community

c) Ecosystem

5 Identify three (3) Biotic factors and three (3) Abiotic factors in the pond ecosystem below

Any 3 Biotic factors:

- 1 Bacteria
- 2 Plankton
- 3 kangaroo

Any 3 Abiotic factors:

- 1 sunlight
- 2 water
- 3 rotting log

6 What materials would you need to build a mini ecosystem in plastic bottle?

soil, sand, water, air, sunlight, plants, insects
