Science Test 1 Student syllabus

Class 1A Chapters 7Aa to 7Ad 40 minutes 50 marks

Prepare for the full list below. The revision guide reviews the chapters and gives practice in the kinds of task you will meet. Test versions select different examples and structures.

Chapter and source pages	Knowledge and skills to revise
7Aa Doctors Book 5; workbook 3	Symptoms and evidence; checks and tests; how medical knowledge changes. Recognise why more evidence may be needed.
7Aa Life processes Book 6–7; workbook 4	All seven MRS GREN processes and meanings; living and non-living things; plant and animal movement, growth and nutrition; applying the processes to unfamiliar examples.
7Ab Organs Book 8–9; workbook 5	Locate and name human organs; know their jobs. Identify leaf, stem, root and storage organs. Know what photosynthesis needs and why organs matter.
7Ac Tissues Book 12–13; workbook 7	Cells, tissues and organs; muscle, fat, root hair and xylem; tissue jobs; evidence used by pathologists.
7Ac Microscopes Book 14–15; workbook 8–9	Parts and jobs; safe focusing; slide preparation; specimens, stains and coverslips; interpreting magnification and multiplying lens powers.
7Ad Cells Book 16–17; workbook 10–11	Cell discovery and improving microscopes; main cell parts and functions; plant/animal comparison; chlorophyll, cellulose and cell sap; specialised cells. Understand image and real size.

Question styles

Multiple choice • matching • naming parts on diagrams • completing tables • short explanations • microscope magnification calculation. Give a few scientific words or short points when explaining; long paragraphs are not needed.

Practise identifying structures in unfamiliar drawings. Learn the science rather than the order of the labels. The revision diagrams are different from the test diagrams.
