Subject: Blood Donation Drive & Bone Marrow Donor Registry

Dear Parents, Guardians, and Pupils,

PASCAL Schools Lemesos are organising a blood donation drive and bone marrow donor registry on **Tuesday, 10th November 2026,** on our school premises. The Blood Donation Drive and the Bone Marrow Donor Registry of the Karaiskakio Foundation will be conducted from **09:30 to 12:30**.

Blood Donation is a life gift for those in need of blood transfusion. According to international statistics, 60% of our population will require blood transfusion at some point in their life. Unfortunately, only 5% of the human population are blood donors! Additionally, the sampling procedure has become widely accepted as the most efficient treatment.

Our schools would like to assist once again, hoping that our mission will be as successful as in previous years. We would like to emphasise that blood donation is completely painless and does not contain any risk for the donor.

Anyone aged 17 or above can become a volunteer donor provided they have no serious medical issues like contagious diseases, malignancies, or heart diseases. Officers of the Blood Bank as well as medical personnel will be on the school premises to provide their services with safety, before, during and after the donation.

For better organisation, please confirm your participation by clicking the link below and completing the registration form by **Monday, 26th October 2026**. We are confident that you will once again show your generosity and support for this noble act of community service.
