Subject: Information regarding the PASS Survey – All Years

Dear Parents/Guardians,

We would like to let you know that our pupils will be completing the **PASS (Pupil Attitudes to Self and School) survey**, developed by GL Assessment, in the coming weeks.

What is PASS?
PASS is a short online questionnaire that helps us understand how pupils feel about themselves as learners and about their experience at school.

It looks at different aspects of pupils' attitudes towards learning and school, including:

- Feelings and attitudes towards school
- Confidence and self-belief as a learner
- Readiness and approach to learning

These areas can help us better understand what supports pupils in their learning and where they may need additional encouragement.

How will PASS help us?
The information can help teachers:

- understand pupils' attitudes towards learning and school
- identify areas where a pupil may benefit from additional encouragement or support
- plan appropriate learning, pastoral or other support when needed

PASS is not a test of intelligence, ability or academic achievement, and it does not form part of a pupil's academic grades.

What does the survey involve?

- It is an online questionnaire and takes approximately 20–25 minutes to complete
- Pupils respond to simple statements about how they feel about school and learning
- There are no right or wrong answers
- Pupils are encouraged to answer honestly and choose the response that best reflects how they feel

Does my child need to prepare?

There is **no preparation** or revision required. Pupils do not need to study for PASS. We simply encourage pupils to listen to the instructions, answer honestly and not worry about getting anything "right" or "wrong". The aim is to give us a better understanding of their experiences and attitudes so that we can continue to support them in the best possible way.

Thank you for your continued support.

Yours sincerely,

Victor Antoniou
